Professional Summary

Detail-oriented Software Tester with strong experience in manual, API, and mobile testing. Skilled in identifying defects early, improving test coverage, and ensuring the stability and reliability of applications within Agile teams.

Core Skills

- Testing Tools: Postman, JMeter, Jira, Trello, TestLink, Browser Developer Tools, Figma, Excel/Google Sheets
- Programming & Scripting: Java, SQL, HTML, CSS, JavaScript (Basic)
- Testing Types: Manual, API, Mobile, Regression, Functional, Performance, Exploratory, Smoke & Sanity
- Version Control & CI/CD: Git, GitHub, GitLab, Jenkins
- Project Management & Collaboration: Jira, Trello, Confluence
- Soft Skills: Communication, Teamwork, Problem-Solving, Fast Learning

Professional Experience

Software Tester | Ukkera Company | 2022 – Present

- Designed and executed comprehensive functional, regression, and performance test plans for mobile applications, resulting in a 25% increase in defect detection and enhanced application stability.
- Performed thorough API testing using Postman and JMeter to validate functionality, performance, and reliability under varying conditions.
- Collaborated closely with development teams to identify, document, and prioritize critical defects, contributing to faster resolution and improved release quality.
- Actively participated in Agile ceremonies to ensure seamless integration of testing activities within development cycles.

QA Trainee – Algoriza (Azm Squad) Internship Program | 2025

- Participated in real-world projects, executing manual testing activities and ensuring high-quality deliverables.
- Collaborated with the development team to successfully deliver projects that were maintained and version-controlled on GitHub.

- Gained practical experience in test case design, defect reporting, and test execution in Agile environments.

Freelance Software Tester | uTest, TestIO, Upwork | 2022 – Present

- Delivered testing services for 15+ global web and mobile projects, meeting strict deadlines and quality standards.
- Produced detailed defect reports that enabled clients to resolve high-priority issues before production release.

Management & Financial Coordinator | Trans Red Sea Co. | 2017 – 2022

- Streamlined client relations and financial processes, increasing operational efficiency by 20%.

Accountant | Mohamed Awad Office | 2014 – 2016

- Maintained accurate financial records and ensured 100% compliance with tax regulations.

Customer Service Representative | Exceed Company | 2010 – 2012

- Resolved customer escalations with a 95% satisfaction rate.

Education

Bachelor's Degree in Commerce and Business Administration

Helwan University, Egypt | Graduated 2009

Training & Professional Development

QA Trainee – Algoriza (Azm Squad) Internship Program | 2025

- Worked on practical projects covering requirement analysis, manual testing techniques, and API validation.
- Gained hands-on experience in automation testing using Selenium to support functional test coverage.
- Developed structured test cases and executed test cycles across web and mobile applications.
- Reported and tracked defects using Jira and GitHub, contributing to improved release quality.

Professional Development & Certifications

- Successfully completed **ISTQB** certification, enhancing understanding of software testing principles and best practices.
- Studied Object-Oriented Programming (**OOP**) concepts to strengthen programming fundamentals relevant to test automation and software quality.

- Successfully completed numerous comprehensive online courses focused on Manual Testing, Quality Assurance fundamentals, and advanced testing methodologies through reputable platforms

including Test IO, uTest, and Udemy.
- Demonstrated commitment to continuous learning and skill enhancement by mastering practical aspects such as test case design, defect management, and systematic test execution.
- Proactively staying updated with industry best practices to deliver high-quality testing outcomes and contribute effectively to team success.
